Subject: **SERVICES PROVIDED BY J.E COSMATOS & Co.**

The Norwegian contingents in KFOR have been dealing with Cosmatos in tasks involving main body deployment, rotation of equipment and seafreight to/from Thessaloniki.

From the time of planning through deployment of the Norwegian NATO forces in KFOR, Cosmatos has been an excellent partner in all matters connected to activities in SPOD.

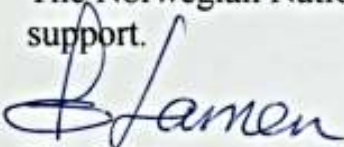

Cosmatos has been the connecting link between Movement Control and the staff of the containerterminal, as well as other necessary functions at SPOD like forklift and crane operator.

When setting up railway transport from SPOD, Cosmatos has organised the details towards the Railway Company.

In all custom matters, all necessary documents have been provided to ensure the quickest SPOD departures and smoothest bordercrossings possible.

When convoys have been set up, Cosmatos has provided catering-service upon request with most reliable satisfying delivery.

The Norwegian National Support Element is satisfied with Cosmatos and their professional support.
